

MainPhos

Mainphos is a mainfert range of pH neutral sustained release nutrient products.

Mainfert has worked with independent manufactures to develop fertilisers that meet modern requirements for non-soluble phosphate and sulphur applications. As with all mainfert nutrient solutions the Mainphos range is adaptable to your system, for capital, maintenance, regenerative or biological farming requirements the Mainphos range is adaptable to all.

Available for granular blends and fine particle fertiliser.

Key benefits:

- High Phosphate availability
- High Calcium
- Low leaching and "lock up" potential
- Other elements can be blended as required

Mainphos product range:

Product	N	P	S	Ca	pH	
Mainphos 14C	0	14	0	25	6.5	Mo and Humate

- Dicalcium Phosphate based product with added Carbon and Molybdenum
- Ideal for pasture capital and maintenance requirements. Mo to increase clover

Mainphos XPC	10	15	1	9		Mo and Humate
---------------------	-----------	-----------	----------	----------	--	----------------------

- Blend of Dicalcium Phosphate, guano Phosphate and DAP with added Carbon and Molybdenum
- Ideal for pasture capital and maintenance requirements when Nitrogen is also required

Mainphos 16	0	16	0	25	6.5	
--------------------	----------	-----------	----------	-----------	------------	--

- Granulated Dicalcium Phosphate
- Ideal for pasture capital and maintenance requirements. Drilling grade available.

Mainphos XP	11	17	1	10		
--------------------	-----------	-----------	----------	-----------	--	--

- Blend of Dicalcium Phosphate, guano Phosphate and DAP
- Ideal for pasture capital and maintenance requirements when Nitrogen is also required

Mainphos 10	0	10	0	26		
--------------------	----------	-----------	----------	-----------	--	--

- Guano Phosphate. Natural form of Phosphate

MainCalci P	0	6	14	73		
--------------------	----------	----------	-----------	-----------	--	--

- Blend of Mainphos 16, Elemental Sulphur and Aglime*
- Ideal for pasture maintenance where there is Calcium deficiency, especially on hill country

MainCalci XP	0	10	14	70		
---------------------	----------	-----------	-----------	-----------	--	--

- Blend of Mainphos 16, Elemental Sulphur and Aglime*
- Ideal for pasture maintenance where there is Calcium deficiency, especially on hill country

*Available at Springfield, Mt Somers and Weston lime works
